5-20

15-30

10-20

3-5

AlgaFeed has broken the barrier to produce high density microalgae on a commercial scale

We provide the complete range of live, natural, high density algal strains delivered to the door as a service

Allow leading shrimp, shellfish and fin-fish hatcheries to substitute sub-optimal in-house grown microalgae with AlgaFeed's portfolio of high density microalgae of unequalled nutritional value

- Reliable supply
- Consistent quality
- Increased survival
- Faster growth
- Higher yields
- Better quality seed
- Higher profits
